***Reasons for allowance***

1. Claims 11-12 and 22-39 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

As per claims 11-12 and 22-39, prior art of record does not teach or fairly suggest an information processing apparatus or method for demultiplexing object streams that includes discrimination means or a discrimination step for discriminating an intellectual property management type of information data included in an object stream, on the basis of management information included in a management stream, and effecting reproduction control of the object stream in accordance with a discrimination result, to control whether the reproduction control is performed before or after decoding the object stream. By virtue of this feature, the information processing apparatus or method can reliably control playback of information data to protect the intellectual property right involved when the intellectual property information has undergone an encryption process or the intellectual property information is embedded in the information data as a digital watermark to protect the intellectual property right.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
